

Banco de Dados

Gerando o Modelo Relacional (Físico) a partir do Modelo Relacional (Lógico)

Roteiro

- Gerando o Modelo Relacional (Físico) a partir do Modelo Relacional (Lógico):
 - Componentes do Modelo Lógico;
 - Componentes do Modelo Físico;
 - Do Modelo Lógico para o Modelo Físico;
 - Executar o Script SQL de criação de BD;
 - Explicação do Script SQL de criação de BD;
 - Atividades.

Componentes do Modelo Lógico

Modelo Relacional Lógico:

- Estrutura de tabelas;
- Colunas;
- Tipos de dados;
- Chaves primárias;
- Chaves estrangeiras;
- Restrições de integridade.

Componentes do Modelo Físico

Modelo Relacional Físico:

- Estrutura de armazenamento em disco;
- Índices;
- Particionamento de tabelas;
- Estratégias de otimização de desempenho.

Stored Connection:	Conexao_MySQL_Local_3309 V			Select from saved connection settings		
Connection Method:	Standard (TCP/IP)		Method to use to connect to the RDBMS			
Parameters SSL	Advanced					
Hostname:	127.0.0.1	Port: 3309		Name or IP address of the server host - and TCP/IP port.		
Username:	root		Name of the	Name of the user to connect with.		
Password:	Store in Vault	Clear	The user's pa	The user's password. Will be requested later if it's not set.		
Default Schema:				The schema to use as default schema. Leave blank to select it later.

                                                                               Next
```

Forward Engineering Progress

The following tasks will now be executed. Please monitor the execution. Press Show Logs to see the execution logs.

- Connect to DBMS
- Execute Forward Engineered Script
- Read Back Changes Made by Server
- Save Synchronization State

Forward Engineer Finished Successfully
